

## Directory of Dental Waste Recyclers

### Notice and Disclaimer

This Directory of Dental Waste Recyclers has been compiled from information supplied by companies listed in websites and other public information sources. It is provided solely for general informational purposes and should not be used as a substitute for a dentist's own evaluation of a prospective recycler.

A listing in this directory does not indicate, and is not to be interpreted as, an endorsement by the American Dental Association (ADA) of the listed recycler, the accuracy of the information in a recycler's listing or the recycler's services or products. The ADA provides no guarantees or warranties for the recyclers and/or their services as listed in this directory.

The information in this directory is current as of October 2008. Since information may change, the directory will be updated periodically. Users who become aware of any updates can send new information to [science@ada.org](mailto:science@ada.org) or can fax updates to 312/440-2536.

ADA recommends that dentists contact recyclers before recovering waste, such as amalgam, and ask about any specific handling instructions the recycler may have. It is important to select a reputable recycler that complies with applicable federal and state law, and provides adequate indemnification for its acts and omissions.

### Some Questions You May Wish to Ask Your Recycler ...

- What kind of waste do you accept?
- Do your services include pick up of waste from dental offices? If not, can waste be shipped to you?
- Do you provide packaging for storage, pick up or shipping of waste?
- If packaging is not provided, how should the waste be packaged?
- What types of waste can be packaged together?
- Do your procedures comply with ANSI/ADA Specification 109: Procedures for Storing Dental Amalgam Waste and Requirements for Amalgam Waste Storage/Shipment Containers?<sup>1</sup>
- Does your company have an EPA or applicable state license?
- Does the company use the proper forms required by the EPA and state agencies?
- How much do your services cost?
- Do you accept whole filters from the vacuum pump for recycling?
- Do you pay for clean non-contact amalgam (scrap)?
- Do you accept extracted teeth with amalgam restorations?
- Is disinfection required for amalgam waste?

---
